[9083P 2 WIRE HIGH CURRENT LOOP TEST METHOD](#)

Performing a high current Earth Loop Impedance measurement with the Di-Log 9083P When testing circuits which are not RCD protected and where the earth loop impedance is low, for example when measuring ZE, performing a high current loop test can give improved accuracy and repeatability. The line impedance (L-N) test can be used to perform a high current earth loop impedance test as shown below: Met...
